PROFILE

Final-year Informatics student at Universitas Syiah Kuala who turns complex problems into clean, functional software. I work across full-stack web, mobile, and machine learning — building products made for **humans first, machines second**. Currently an IBM SkillsBuild AI Scholar, deepening my work in ML and AI engineering, and eager to grow through hands-on, interdisciplinary learning.

EXPERIENCE

Vice Chairman I (Wakil Ketua I)

Jan 2026 – Present

HMIF USK — Informatics Student Association

Elected to lead organizational strategy, inter-department coordination, and student representation, steering cross-functional initiatives across 5+ active departments.

AI Scholarship Recipient

Jan 2026 – Jun 2026

Pijak × Dicoding × IBM SkillsBuild

Selected for a fully-funded AI track; completed coursework in Python, Machine Learning, Deep Learning, and Building Machine Learning Systems.

Vice Head — Social Community Dept.

Jan 2025 – Dec 2025

HMIF USK

Coordinated community outreach and student-welfare programs, managing collaboration between the department and external stakeholders.

Staff — Videography & Design

Jan 2024 – Dec 2024

BEM FMIPA USK — Student Executive Board

Produced visual content and documentation for faculty-level events, publications, and organizational campaigns.

SELECTED PROJECTS

SkillBridge

AI · CAPSTONE

An AI-powered skill-matching engine that connects learners to relevant opportunities. **Group project — my role: MLOps & backend**, building the cosine-similarity matching engine and the FastAPI service integrating pre-trained NLP models.

Python · FastAPI · scikit-learn · NLP

SILAPOR Banda Aceh

SMART CITY

A civic-engagement platform that lets citizens report public issues and track resolutions directly with the city government.

Laravel · Vue.js · PostgreSQL

Climate Action

MOBILE

An eco-community app connecting users with local environmental events, featuring a waste-to-reward gamification system.

Flutter · Dart · Firebase

Aqua Save

IOT

An IoT-integrated water-monitoring app with real-time usage analytics, sensor management, and conservation guides.

Kotlin · Firebase · IoT

MilanoSport

WEB APP

A sports-venue reservation platform where users check availability and book courts instantly.

Next.js · Tailwind · Prisma

FOCUS

Building human-centred products at the intersection of software, machine learning, and social impact — and growing through hands-on, interdisciplinary, and collaborative work. Full case studies at [milanramadhan.vercel.app](#).
